

SmartCab

Private dispatch infrastructure for independent drivers and fleet operators

COUNTRY Switzerland Geneva	INDUSTRY Transportation Tech	DEVELOPMENT TIMEFRAME 6 months	LAUNCH DATE March 2026
WHAT WAS DONE Branding, Logo, Native App UX/UI (iOS & Android) — Multilanguage: French, English, Italian, German			BUDGET < \$70K

SCOPE

A private dispatch infrastructure built for independent cab drivers and fleet operators in Geneva. SmartCab replaces dependency on ride-hailing algorithms by giving drivers full ownership of their clients, pricing, and network. The app handles the complete driver workflow — from AI-powered WhatsApp booking to team dispatch, custom pricing rules, and automated invoicing — across three subscription tiers (Lite, Pro, Premium) available on iOS and Android.

KEY FEATURES

- AI-powered WhatsApp booking — customer messages auto-converted to structured rides, zero manual entry
- Ride management dashboard with Urgent mode and Away Mode auto-dispatch
- Market Price intelligence — compare your rate to real-time market median (min / median / max)
- Three driver plans: Lite (free + 5 CHF/ride), Pro (90 CHF/mo), Premium (120 CHF/mo) via RevenueCat
- Team and group management with auto-dispatch, referral codes, and commission tracking
- Custom pricing rules: pickup fee, CHF/km, CHF/min, hourly rate — per vehicle category
- Business dashboard: real-time revenue, monthly orders, accounting, and client tracking
- Bexio API integration for automated invoicing and profitability tracking
